AWARENESS WEBPAGE

The screenshot shows a web browser window with multiple tabs. The active tab is titled "Plasma Do..." and the address bar shows "Not secure | 169.51.203.254:30123". The webpage has a light beige background. At the top left is a red blood drop icon with a heartbeat line. At the top right are links for "Home" and "Log in". The main heading is "Plasma Donor Application". Below it is a section titled "What is plasma Donation?" in red. The text explains the plasma-only donation process. A button labeled "Donate Plasma through our application" is below the text. Further down is a section titled "Why there is a need of plasma donation?" in red, followed by a paragraph about the benefits of plasma. A red speech bubble icon is on the right. The Windows taskbar at the bottom shows the date as 19-11-2022 and time as 23:46.

Plasma Donor Application

What is plasma Donation?

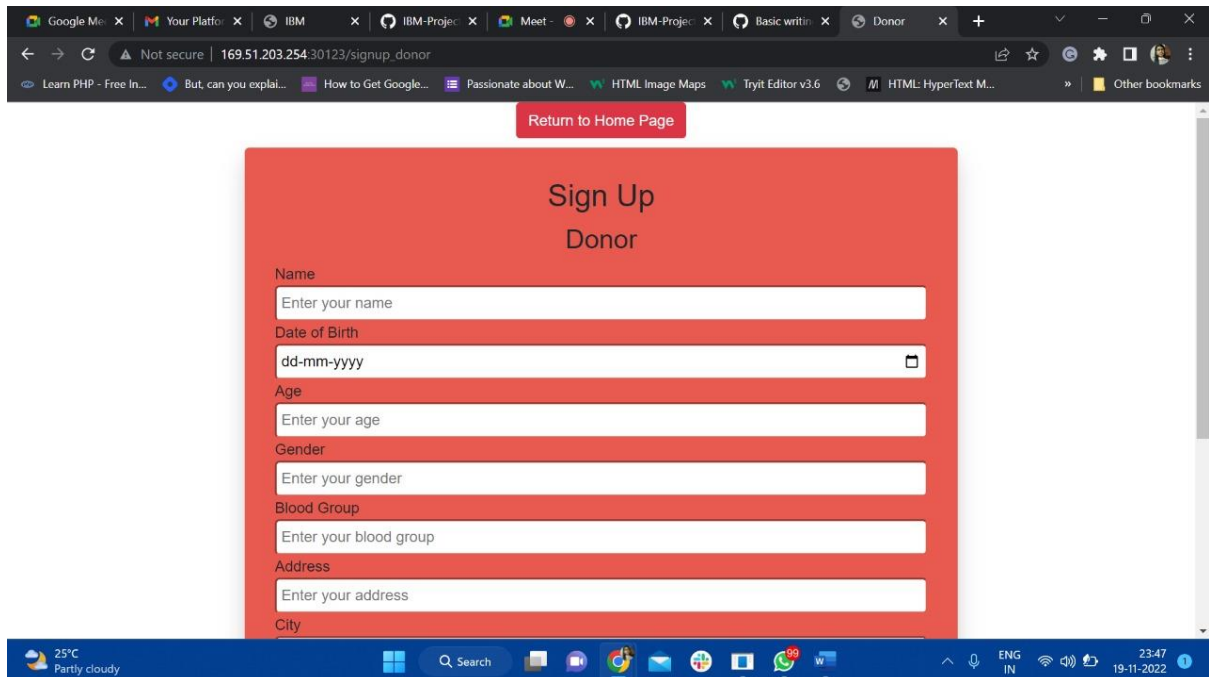

In a plasma-only donation, the liquid portion of the donor's blood is separated from the cells. Blood is drawn from one arm and sent through a high-tech machine that collects the plasma. The donor's red blood cells and platelets are then returned to the donor along with some saline. The process is safe and only takes a few minutes longer than donating whole blood. Donated plasma is frozen within 24 hours of being donated to preserve its valuable clotting factors. It can be stored for up to one year and thawed for transfusion to a patient when needed.
